**Venue** SMX CONVENTION CENTER MANILA Meeting Room 10

**Presentation Title:** PARADIGM SHIFTS IN DENTAL IMPLANT SURGERY

Implant supported prosthesis is becoming, if it has not yet become, the gold standard in the restoration of edentulous areas. In the previous years the dental world has witnessed changes in the approaches in guided implant surgery and bone augmentation procedures. This presentation highlights such techniques to improve the service of dental implant surgery by the dental practitioner.
