**Presentation Date:** Tuesday 8 May 2018 8:00 AM -9:00 Am & 1:00 PM - 2:00 PM

**Venue** SMX CONVENTION CENTER MANILA Function Rooms 1 & 2

**Presentation Title:** INFECTION CONTROL BY THE DENTAL TEAM

This fast-paced presentation hopes to deliver current information about day-to-day infection control practices in the United States and help improve the dental team's understanding of what works and what doesn't, what needs to be done and what must be avoided in an effort to prevent and contain infection in dental office settings. The speaker also aims to impart knowledge that may save lives in the future, raise awareness on emerging bacteriologic concerns and finally, discuss potentially deadly outcomes from good intentions.

**Learning Objectives:**

Part I: Fundamentals - Infection Cycle -Terminologies - Etiology - Types of Instruments based on contact

Part II: Mechanics of Prevention - Sanitation - Disinfection and Disinfectants - Sterilization and Sterilizers - Biologic Monitoring, Spore Testing - Bleach Vs. Alcohol

Part III: Personal and Operatory Protocols - Needle Recapping - Handwashing - Biofilms - Waterline Contamination - Biohazardous Waste - Barriers - Disposables - PPE

Part IV: Diseases and Modes of Transmission - Hepatitis - HIV - Tuberculosis - Herpes

Part V: Video Clip - Lecture ends with a Video Clip for the audience: "If Saliva Were Red"
