

JUAN F. YEPES, D.D.S., M.D., M.Ph. M.S. Dr.PH.

Associate Professor, Indiana University, Paediatric Dentistry
 Attending, Riley Children Hospital, Indianapolis, Indiana
 Board Certified. American Board of Paediatric Dentistry, Oral Medicine and Dental
 Public Health

Masters in Paediatric Dentistry, University of Kentucky, 2012
 Doctorate in Public Health with emphasis in Epidemiology, University of Kentucky,
 College of Public Health, 2011

Masters in Public Health, University of Kentucky, College of Public Health, 2008
 Residency Program, Dental Public Health, University of Texas, College of Dentistry
 Residency Program in Oral Medicine University of Pennsylvania, 2004

Fellowship Program in Radiology, University of Iowa, 2002
 Doctor of Dental Medicine, Javeriana University, Bogota Colombia
 Doctor of Medicine, Javeriana University, Bogota, Colombia

Fellow, Dental Surgery, Royal College of Surgeons, Edinburg
 Member, Editorial Board, Journals of Paediatric Dentistry, Oral Surgery. Oral
 Medicine, Oral Pathology and Oral Radiology

Active Member, American Academy of Paediatric Dentistry
 Active Member, American Academy of Oral and Maxillofacial Radiology
 Active Member, American Association of Public Health Dentistry,
 Active Member, Indiana Dental Association
 Active Member, American Dental Association

Presentation Date: Sunday 6 May 2018 9:00 AM - 12:00 PM

Venue SMX CONVENTION CENTER MANILA Function Room 2

Presentation Title: CLINICAL APPLICATION OF RADIATION SAFETY

Outline

This seminar will provide to the attendee with the most up-to-date information regarding the fascinating field of orofacial pain. The seminar will use case-presentation as the learning and discussion format and will cover the entire spectrum of the most common orofacial pain issues that a dentist will encounter in the practice

Objectives

After attending this seminar, the participant will be able to:

- Understand the importance of "building" a differential diagnosis based on the clinical presentation
- Learn the most common orofacial pain conditions
- Learn the most updated treatment for the most common orofacial pain conditions.

Presentation Date: Monday 7 May 2018 9:30 AM - 11:30 AM & 2:30 PM - 4:30 PM

Venue SMX CONVENTION CENTER MANILA Function Room 3 & 4

Presentation Title: ORAL PATHOLOGY AND RADIOLOGY IN CHILDREN

Outline:

This seminar will provide to the attendee with the most up-to-date information regarding the fascinating and emerging field of oral pathology and radiology in children. The seminar will use case-presentation as the learning and discussion format and will cover the entire spectrum of the most common soft tissue lesions in infants, children and adolescents as well as radiographic lesions.

Objectives:

After attending this seminar, the participant will be able to:

- Understand the importance of "building" a differential diagnosis based on the clinical presentation of oral lesions
- Learn the most common soft tissue lesions in infants, children, and adolescents
- Learn the most updated treatment for some of the most common oral conditions besides gingivitis and dental caries
- Understand the importance of "building" a differential interpretation in radiology
- Learn the most common radiographic lesions in infants, children and adolescents.

Presentation Title: MANAGEMENT OF MEDICALLY COMPROMISED CHILDREN

Outline

This seminar will provide the attendee with the most up to-date information regarding the fascinating field of oral medicine in pediatric dentistry. The seminar will use case presentation as the learning and discussion format and will cover the entire spectrum of oral medicine and pediatric dentistry. Topics such as diabetes, asthma, congenital heart disease, and the implications on the practice of pediatric dentistry will be reviewed.

Objectives

After attending this seminar, the participant will be able to:

- Understand the most significant implications of medical diseases in the practice of dentistry
- Learn the most critical aspects of dental protocols for medically compromised patients
- Learn the indications of oral cavity manifestations of systemic diseases.
