**Presentation Date:** Friday 11 May 2018

**Venue** SMX CONVENTION CENTER MANILA Meeting Room 13

**Presentation Title:** THE ENDODONTIC - PERIODONTAL LESIONS: RECOGNITION, DIAGNOSIS AND MANAGEMENT

The Identification and Treatment of the Endo - perio lesion is a usual problem for most dental practitioners. Common symptoms to both lesions are said to mimic each other which may result to incorrect diagnosis leading to therapeutic interventions that do not necessarily address the actual lesion.

A thorough understanding of the Endo-perio lesion, it's diagnosis and management are the aims of this presentation to be able to crack the Endo-perio dilemma.
