<b>Presentation Date:</b>	<b>Friday 11 May 2018 10:00 AM - 11:00 AM</b>
<b>Venue</b>	<b>SMX CONVENTION CENTER MANILA Function Room 5</b>
<b>Presentation Title:</b>	<b>TMD: MYTHS AND FACTS</b>

Despite today's scientific advances in dentistry, many practitioners still propose diagnostic and treatment methods for Temporomandibular Disorders or TMD that have little or no scientific evidence. Even worse many are based purely on anecdotal information passed on from one practitioner to the next. This can result in misdiagnosis and thus failure to manage a patient's pain problem or result in unnecessary treatment of patients without TMD. This lecture will tackle the most common myths and most current scientific facts regarding TMD.
