Presentation Date: Monday 7 May 2018 9:00 AM - 10:30 AM & 2:00 PM - 3:30 PM

Venue SMX CONVENTION CENTER MANILA Meeting Rooms 7, 8 & 9

Presentation Title: PRINCIPLES, INSTRUMENTATION & TECHNIQUES: A REVISIT OF TEETH PREPARATION FOR CROWNS AND BRIDGES

In the advent and the recent development and availability of new materials for crowns and bridges, certain requirements are altered to suit particular demands of the denture service. But definitely, basic things remain the same. They rarely change. They just evolve. Part and parcel of this evolution, is revisit of the principles, instrumentation and techniques for preparation of the teeth to accept fixed restorations. This presentation talks about these.

Learning Objectives:

After the presentation, the participants will become aware and reminded (if and when applicable) of the various principles, instrumentation and techniques in crown preparation for crowns and bridges
