Fellow, Academy of Medicine, Singapore
Member, Scientific Panel, Journal of Endodontics, American Association of Endodontists
Member, Scientific Panel, Hong Kong Dental Journal

Presentation Date: Tuesday 8 May 2018 8:00 AM - 9:00 AM & 1:00 PM - 2:00 PM

Venue SMX CONVENTION CENTER MANILA Function Room 3 & 4

Presentation Title: CONSERVATIVE, CONVENTIONAL, AND UNCONVENTIONAL ENDODONTICS

With improving scientific knowledge and understanding of pulp and periradicular disease together with advancing technologies and management protocols, endodontic therapy is now performed with greater precision and predictability.

This lecture will review techniques used in the conservative management and preservation of the vital pulp including the current state of pulp revascularization; discuss fundamentals to achieving greater predictability and success with conventional endodontic treatment and showcase some 'unconventional' treatment modalities which has enhanced our ability to preserve the compromised tooth

Learning Objectives:

- Understand the mechanisms and techniques for pulp preservation and regeneration.
- Understand principles for predictable endodontic treatment
- Demonstrate success with 'unconventional' endodontic procedures
