<b>Venue</b>	<b>SMX CONVENTION CENTER MANILA Function Room 5</b>
<b>Presentation Title:</b>	<b>OROFACIAL PAIN AND TMD MANAGEMENT</b>
	<p>Temporomandibular disorders (TMD) and orofacial pain management is one of the much-debated issues in the field of dentistry due to a wide variety of treatment modalities with few high quality randomized, double blinded controlled trials and metaanalysis that support their safety and efficacy. Currently, the better understanding of orofacial pain's incidence, etiology, co-morbidities and investigations, which are highly important factors in managing chronic pain cases, suggests a number of new effective medical and dental approaches to safely treat this group of patients. This presentation will provide the topic of TMD and other forms of orofacial pain conditions commonly found in dental clinics and will discuss practical recommendations for their management in the general practice setting.</p>
